ITS-RP208CN 8 Zone Control Panel

ITS-RP208CN control panel series possess advanced technology and perfect functions equipped with our popular LCD keypads, 8 programmable zones, and the features of networking, linking and alarm linkage output. The control panels adopt separated control keypads and has a strong ability to prevent destruction. It is compatible with internationally popular communication formats. With chargeable circuits and a clock, it has memory functions, so that programmed parameters and the information of the control panel's condition is saved when the power is lost.

This system adopts the latest technology, LSI application, SMY jointing technology, and digital program design to enhance the reliability and stability of the system. Its appearance is compact and elegant with a smart shape.

Main Features

- 8 programmable zone
- Control keyboard with LCD
- One key rapid system deployment, a key to rapid deployment perimeter and password disarm
- 3 Keypad emergency zones (button): Panic [1] + [2], Fire [4] + [5], Special Emergency [7] + [8]
- LED displays Alarm, Power, Armed, Bypass, Ready and Tamper
- System fault indication
- Can connect up to four Keypads to operate the system
- Date and time
- Power-down without losing programming parameters and host state information
- 2 alarm monitoring station telephones
- Built-in digital communications device, compatible with international standard
- Built-charging circuit for extended battery life
- Keypad has backlight keys
- Keypad is tamper supervised
- Automatic day deployment
- Automatic test report to the alarm monitoring center
- 50 Event Records
- 10 Group 4 classification code
- Transformer 16.5VAC 40VA
- Backup Battery 12VDC 6amp
- Host and the maximum communication distance of 1500m detector
